Forgotten Books, United States, 2016. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from The Fall of Blood-Pressure Resulting From the Stimulation of Afferent Nerves: A Thesis Method of experimenting. In addition to the method of cooling, other methods were employed to produce a re ex fall of blood-pressure these willbe described in their proper places. The animals used were cats, dogs, and rabbits and they were in all cases anaesthetized, by some method. The vagi were cut in most cases. The blood-pressure was taken from the carotid and recorded in the usual manner. In most of the experiments the nerve stimulated was the sciatic, but sometimes the saphenous, ulnar, median or anterior crural and occasionally other nerves were used. I Shall consider first the stimulation of the sciatic, and then compare with these results the effects produced when the other nerves were stimulated. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy.
