Reviews

It is straightforward in go through easier to recognize. I actually have study and that i am sure that i will going to study yet again again down the road. Once you begin to read the book, it is extremely difficult to leave it before concluding.

Fifty grams washed kaolin taken with 100 cm³ distilled water. Solution neutral to litmus. Found in 50 cm³ (as sulphates): a a Corrections have been appiied to these figures for impurities in the barium hydroxide solution used as follows: MgO 0.0001, K₂O 0.0004, Na₂O 0.0006 gram. Subtracting from the bases dissolved by copper sulphate solution that quantity which water alone takes up from the kaolin, 0.04 millimol, we have the following comparison of the copper precipitated and the bases replacing it: The agreement is sufficient to show that the main reaction which takes place is an exchange of bases in equivalent quantities between the kaolin and the solution. Any adsorption that occurs is probably not over 0.02 millimol or 0.0013 gram copper, which in 25 grams kaolin is one in 20,000. In the case in which the bases are 0.04 millimol in excess the solution had unusual opportunity to dissolve material from glass, in which it stood for about five months. Copper sulphate solution containing 2 millimols in 50 cm³ when filtered through 25 grams of kaolin in a column 1 cm. in diameter came through at first colorless and contained chiefly calcium sulphate. The investigation of the action...
