NOISE CONTROL IN UNDERGROUND METAL MINING (PAPERBACK)

Createspace, United States, 2013. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.Noise-induced hearing loss (NIHL) is the most common occupational illness in the United States, with 30 million workers exposed to excessive noise levels every day. Of particular concern is the mining industry, which has the highest prevalence of hazardous noise exposure of any major industry sector and is second only to the railroad industry in prevalence of workers reporting hearing difficulty. This document...
