

Wind Engineering: Retrospect and Prospect, volume 3

By IAWE

New Age International (P) Limited, 2011. Hardcover. Condition: New. 5th or later edition. The International Association of Wind Energy (IAWE) has been holding 4-yearly conference on Wind Energy since 1963. This conference rotates amongst the Asia-Pacific region, Americas and, Europe and Africa. This has become a major event for those interested in wind engineering research and the conference brings forth a rich collection of information in the latest research in the subject. The research papers for the conference cover a wide spectrum of themes related to Wind Engineering, which include Wind Characteristics, Extreme Winds, Bluff Body Aerodynamics, Wind Tunnel Techniques and Studies, Field/Prototype Measurements, Computational Fluid Dynamics and Fluid Structure Interaction, Bridges and Cable Structures, Roofs and Low Rise Buildings, Tall Buildings, Towers, Chimneys and Transmission Lines, Vibrations and Dampers, Atmospheric Dispersions and Particle Drifting, Wind Breaks, Wind Power and Waves, Wind Codes and Design Problems, and Disaster Assessment and Reduction. The papers related to conference held at Roorkee University (India) have been compiled in five volumes by Prem Krishna, Chairman, IAWE and presented as, "Wind Engineering Retrospect and Prospect." The research papers contained in these five volumes number nearly 200, and are authored by over 450 authors from 25 countries....

Reviews

This is the finest book i have got study till now. It usually does not price a lot of. I found out this publication from my i and dad encouraged this book to understand.

-- **Jamil Collins**

Absolutely among the best book I have possibly go through. I have go through and that i am certain that i am going to gonna read through once again again in the future. I am just delighted to tell you that this is basically the finest book i have got go through within my personal existence and could be he finest book for ever.
