

Emergent Sandbar Dynamics in the Lower Platte River in Eastern Nebraska? Methods and Results of Pilot Study, 2011 (Paperback)

By U S Department of the Interior

Createspace Independent Publishing Platform, United States, 2014. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.The lower Platte River corridor provides important habitats for two State- and federally listed bird species: the interior least tern (terns; *Sternula antillarum athallassos*) and the piping plover (plovers; *Charadrius melodus*). However, many of the natural morphological and hydrological characteristics of the Platte River have been altered substantially by water development, channelization, hydropower operations, and invasive vegetation encroachment, which have decreased the abundance of high-quality nesting and foraging habitat for terns and plovers.
