Taylor Francis Inc, United States, 1995. Paperback. Condition: New. New.. Language: English . Brand New Book ***** Print on Demand *****.Are humans unique? This simple question, at the very heart of the hybrid field of biological anthropology, poses one of the false of dichotomies-with a stereotypical humanist answering in the affirmative and a stereotypical scientist answering in the negative. The study of human biology is different from the study of the biology of other species. In the simplest terms, people s lives and welfare may depend upon it, in a sense that they may not depend on the study of other scientific subjects. Where science is used to validate ideas-four out of five scientists preferring a brand of cigarettes or toothpaste-there is a tendency to accept the judgment as authoritative without asking the kinds of questions we might ask of other citizens pronouncements.
