Business Engineering and Service Design with Applications for Hospitals (Paperback)

By Oscar Barros

Business Expert Press, United States, 2013. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.Business Engineering attempts to provide tools, as other engineering disciplines have, for the design of businesses. This implies that enterprises should be formally designed and that their architectures, including processes, people organization, information systems, IT infrastructure and interactions with customers and suppliers should be considered in a systemic way in such design. This Enterprise Design is not a onetime effort, but, in the dynamic environment we face, organizations have to have the capability to continuously evaluate opportunities to improve their designs. Our approach includes the integrated design of a business, its service configuration (architecture) and capacity planning, the resource management processes and the operating processes. Such an approach is based on general patterns that define service design options and analytical methods that make possible resource optimization to meet demand. This is complemented with technology that allows process execution with BPMN tools and web services over SOA. In summary we integrate the design of a business with analytics and supporting IT tools in giving a sound basis for Business Engineering. Our proposal has been extensively tested and improved based on the experience...
