EVOLUTION AND IMPACT OF TRANSPOSABLE ELEMENTS

Book Condition: New. Publisher/Verlag: Springer Netherlands | During the last 50 years, the perception of transposable elements (TEs) has changed considerably from selfish DNA to sequences that may contribute significantly to genome function and evolution. The recent increased interest in TEs is based on the realization that they are a major genetic component (at least 10--20%) of all organisms and a major contributor to the mutation process. It is currently estimated that 70--80% of spontaneous mutations are the result of TE-mediated...
