

## Transactions of the American Electrochemical Society Volume 38

Filesize: 9.16 MB

### **Reviews**

*A must buy book if you need to adding benefit. Indeed, it can be engage in, continue to an amazing and interesting literature. I am effortlessly can get a delight of reading a published pdf.*  
*(Elliott Wuckert)*

**TRANSACTIONS OF THE AMERICAN ELECTROCHEMICAL SOCIETY VOLUME 38**

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 138 pages. Dimensions: 9.7in. x 7.4in. x 0.3in. This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1921 edition. Excerpt: . . . at the present time not so certain as to this. Cushman, since his work on the corrosion of fence wire, has always contended that manganese is harmful to iron, and, as a result, has been a strong advocate of an iron as low as possible in this element. However, Cushman failed to analyze his samples of fence wire for copper, which is unfortunate, since O. W. Storey<sup>8</sup> later found that certain specimens of fence wire that had shown great resistance to corrosion contained copper, and reached the additional conclusion that, as far as corrosion is concerned, manganese is neutral. In view of what is now known as to the effects of copper in steel on atmospheric corrosion, it is very probable that Cushman's conclusions as to the rapid corrosion of fence wire are somewhat at fault. However, this does not detract from the value of his paper, since it was written some years ago, before the corrosion of iron was being intensively investigated, and was, no doubt, of great value in calling attention to the importance of the corrosion problem and of stimulating work upon it. <sup>1</sup> Manuscript received August 6, 1920. National Lamp Works, General Electric Co., Cleveland, Ohio. Chemical Engineer, New Brunswick, N. J. Chromium has usually been considered as beneficial to the rustresisting properties of iron, although little work has been done. In some of our previous work<sup>9</sup> we noticed that copper makes iron red-short, and that the fracture has...
