This significant study traces the relationship between education and social change in Ireland from the 17th to the 20th century, marking the effects of the successes and failures of educational policy on Irish society. Incisively written by a leading group of contributors, the book is both sweeping and thorough in accounting for the various manifestations of education in Ireland. Educating Ireland measures how the education system altered the times, as well as how it changed with them. Issues, such as the training of the Garda Síochána, are illustrated along with the policing of the education system by the Church and State. Combining scholarly rigor and lively analysis, the material is presented in a manner that is varied, yet thematically unified. It is a narrative concerning education that encompasses the character of the Irish nation as a whole.
