

Natural Fight against Viral Diseases

By Salehi, Mohammad / Najafi, Somaye

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | Despite the progress in human medicine, some viral diseases are the leading causes of death in humans worldwide. The lack of effective therapies and the quick emergence of new drug-resistant viruses have urged a need for developing new agents to treat viral diseases. Several hundred natural products have been isolated for screening and identifying antiviral activity, and some have been shown to have great medicinal value in preventing and/or ameliorating viral diseases in preclinical and clinical trials. There are innumerable potentially useful medicinal plants and herbs waiting to be evaluated and exploited for therapeutic applications against genetically and functionally diverse virus families. This book focuses on several pathogenic viruses and antiviral natural compounds. we tried to use an update literature to most viral disease and understandable materials for public individuals. It can also provide clues for further research to researchers. The authors of this book have reviewed more than 300 articles and books. | Format: Paperback | Language/Sprache: english | 128 gr | 220x150x4 mm | 84 pp.

Reviews

This book is definitely not straightforward to get started on studying but extremely exciting to read. It is really simplistic but shocks in the 50 percent of the ebook. Once you begin to read the book, it is extremely difficult to leave it before concluding.

-- Ally Reichel

This publication is amazing. It is definitely basic but shocks in the fifty percent of your publication. You wont feel monotony at anytime of your own time (that's what catalogues are for concerning if you question me).
