

Public Financing of Public Service Broadcasting and its Qualification as State Aid

By Benjamin Linke

Peter Gmbh Lang Nov 2015, 2015. Taschenbuch. Condition: Neu. Neuware - The book sheds light on the demands of Art. 107(1) TFEU regarding public funding of public service broadcasting (PSB). Broadcasting is of particular importance in the modern structure of democracy. PSB provides broadcasting services that are of higher quality and of more cultural value to the community than services provided by commercial broadcasters. To ensure the operation of PSB, Member States of the European Union have introduced various measures to support broadcasters. These support measures have to comply with European State aid law, which seeks to prevent overcompensation. In its Altmark Trans-ruling, the ECJ laid down specific criteria under which compensation for services of general economic interest (SGEI) should not be considered State aid in the sense of Art. 107(1) TFEU. The author focuses on the Altmark-criteria. Apart from Art. 107(1) TFEU, he also looks at the effect of the Amsterdam Protocol, which is occasionally argued to have a significant impact on the application of the State aid rules to PSB. 151 pp. Deutsch.

Reviews

The ideal ebook i possibly study. Better then never, though i am quite late in start reading this one. It is extremely difficult to leave it before concluding, once you begin to read the book.
