The arrangement of the matter has been based upon that in the Intermediate Text-Book of Logic, by Professor Welton and Mr. A. J. Monahan, but this will not prevent the book from being used with any other text-book. Each chapter consists of a short demonstration with specimen answers to typical problems of the kinds which most frequently present themselves to the student of Logic; and these demonstrations are followed in each case by a selection of exercises, many of which have been actually set at examinations. The last chapter consists of a large collection of miscellaneous examples, including a number of arguments to be analysed.
