Thieme Medical Publishers, United States, 1999. Hardback. Book Condition: New. 254 x 180 mm. Language: English . Brand New Book. Speech-language clinicians who work with children have for a long time had trouble obtaining clinical reference material designed specifically for children. This comprehensive book furnishes the reader with a complete source of information on assessment, treatment, and management strategies for children with developmental apraxia, dysarthria, and stuttering. A Brandon-Hill Selection. Special features of this work include: More extensive coverage of several topics including pediatric dysphagia and management of disfluency as a motor speech disorder Contributing writers are clinicians actively working with children An innovative chapter on an integrated treatment approach in developmental apraxia Discussion of treatment efficacy issues, a particularly timely topic This timely book integrates neuroanatomical and neurophysiological development issues with speech motor control and motor learning as a basis for treatment planning and service provision. Written by some of the leading clinicians and researchers in the field, it presents a strong theoretical framework to view cases within, but also provides real clinical practical information. Plus, information is presented in a manner that is easily applied by clinicians and students.
