Our belief is that an effective SOP process is the key to running an effective supply chain. An effective SOP process provides the necessary framework for introducing initiatives like Six Sigma and lean manufacturing because the SOP provides a framework to identify areas that need improvement. We have laid out the supply chain improvement process as a series of logical steps that culminate in the implementation of a Sales and Operations Planning (SOP) business process. Each step of our improvement process is designed to provide value to the business, and is easy to digest. Taken together, the five steps provide a structured path for improving SOP.
