RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 92 pages. Original publisher: Washington, D. C. : National Aeronautics and Space Administration, Office of Management, Scientific and Technical Information Division ; Springfield, Va. : For sale by the National Technical Information Service, 1991. OCLC Number: (OCoLC)34370817 Subject: Astronautics -- Communication systems. Excerpt: . . . ion I INTRODUCTION Laser diode devices, to be qualified for space communication or other space applications, are required to have high reliability because of the cost and the difficulty of performing repair or maintenance tasks in the space environment. High power operation is required for laser sources in space communication to reduce the overall size of both the transmitter and receiving systems. Prior to the beginning of this work, the CSP laser was the best known AlGaAs diode laser structure for high power in a single spatial mode in the 780-870 nm wavelength range. CSP lasers developed under previous contracts have exhibited single spatial mode emission at output powers to 160 mW, with phase front aberrations less than 1/40 of a wavelength rms and power conversion efficiency exceeding 35%. It was therefore an excellent candidate for high power space communication....

Reviews

Absolutely essential read publication. It absolutely was written very completely and valuable. It is extremely difficult to leave it before concluding, once you begin to read the book.
