

Quantum Confined Semiconductor Nanostructures Volume 737 MRS Proceedings

By -

Materials Research Society. Hardcover. Book Condition: New. Hardcover. 834 pages. Dimensions: 0.0in. x 0.0in. x 0.0in. Progress in nanoscale engineering, as well as an improved understanding of the physical phenomena at the nanometer scale, have contributed to the rapid development of novel nanostructured semiconducting materials and nanodevices. Using new approaches, semiconductor structures can be fabricated with sub-nanometer accuracy and precisely controlled electronic and optical properties. The immense technological potential and new exciting physics have stimulated interest in semiconductor nanostructures over several years. This book brings together a single comprehensive overview of recent progress and future directions in nanoscale semiconductor research. Fields ranging from materials science to physics, chemistry, electrical and microelectronic engineering, circuit design, and more, are represented. Topics include: quantum dot theory, growth and optics; single quantum dot spectroscopy; charge and spin; SiGe quantum dot structures; bio-quantum dots; electric force microscopy and charge injection; transport; Si nanocrystals and nc-Si superlattices; SiGe nanostructures; bioactive nanostructures; lithographic techniques and lateral nanopatterning; semiconductor nanowires and nanotubes; metallic and rare-earth-doped nanoparticles; theoretical studies and numerical simulations in SiSiGe nanostructures and applications of Group IV nanoscale materials. This item ships from multiple locations. Your book may arrive from Roseburg,OR, La Vergne,TN. Hardcover.

Reviews

Very beneficial to all category of folks. We have study and that i am sure that i will planning to go through yet again again in the future. Its been printed in an extremely straightforward way in fact it is just soon after i finished reading this pdf where actually changed me, alter the way i really believe.

-- Emmett Mann

Comprehensive information! Its this sort of great go through. It really is rally interesting throug studying time. I am just quickly can get a satisfaction of looking at a created pdf.

-- Alexandra Weissnat
