Agglomerative Subcenters: In Monocentric Cities (Paperback)

By John F Sase Ph D

Createspace Independent Publishing Platform, United States, 2013. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.Suburbanization has led to the agglomeration of employment and business activity at subcenters removed from the Central Business District (CBD). To address the development of these subcenters in the past half century, this study revises the Standard Urban Model by: 1. Tracing historical origins and variations of the model over the many millennia; 2. Developing a negative-exponential model of agglomerative employment and business subcentering based on the historical findings; and 3. Testing this model using a comparative t-test and a Davidson-MacKinnon model-specification error test to ascertain the existence and location of peak subcenter activity. On average, the distances of the employment and sales peaks occur midway between the CBD and the furthest Major Retail Centers. This volume explores the development of the monocentric urban model. Throughout the following chapters, the history of the concept, the development of the general model, and the creation of a specific model, which includes subcenters, are considered. Next, the specific model is tested against business-census data for ten radial monocentric cities in the United States. Results and implications are reported. Finally, a survey of research...
