ODORANT RECEPTOR GENE REGULATION IN THE ZEBRAFISH, DANIO RERIO

Dr. H. H. Verlag Driesen Dez 2002, 2002. Taschenbuch. Book Condition: Neu. 19x12x cm. Neuware - The sense of smell enables an organism to extract vital information from the composition of its odor environment. Each olfactory receptor neuron faces the daunting task of selecting one odorant receptor (OR) gene from the vast array of about 100 and 1,000 OR genes in fish and mammals, respectively. Thus far, the control mechanism of this highly differential gene expression is largely unknown. Silke...

This sort of publication is everything and taught me to hunting ahead and much more. Better then never, though i am quite late in start reading this one. I am just very happy to explain how here is the best pdf i actually have read within my personal daily life and can be he greatest publication for actually.
